

Feb 5 2003

I attended the meeting at the region last week and thank Councillors Flynn and Elgar for assembling such an interesting and diverse panel. It was very educational. My questions are as follows:

- 1) Why isn't odour high on the list of criteria to be studied? I am sure it is high on the resident's list.
- 2) Has council received enough scientific information on the detrimental environmental impact of the increased phosphorus into our lake?
- 3) Why is this whole situation being rushed through? It is only now that we are becoming aware of the proposed expansion. Please take your time!

Sincerely,

Nancy Clark
