Subject: Sewage Treatment

Expansion

02/05/2003  
04:02 PM

Dear Mr. Ohashi:

We are the concerned residents regarding the proposed Sewage Treatment Expansion. We are against the proposed expansion after attending the Jan. 29th evening meeting and knowing the effects. We are sure many nearby residents having same feeling if they know the effects. No matter how advanced the technology and how state of art the facility, such huge expansion is going to have adverse effects. We urge the region council should allow more time, send the message out, and let people know what's going on and make informed decision.

Several questions have been repeatedly asked at the meeting:

- Most residents don't know what's going on or don't know enough. We need more time to respond.
- The smell mention; don't mention we are having bad smell now, before expansion.
- The natural buffer zone is far too small.
- What are the alternatives? If Zenon company (MRS Shinn quoted the statement) has good technology to solve the sewage north of Dundas, Why do we need to expand to serve that area, even Milton and Halton Hills

.....

We are look responsesard to your reponses. Like the lady said at the meeting, Mr. Flynn and Elgar, we need you to work and to protect us.

Yours truly

C. Jiang & J. Liu
