Subject: Mid Halton

Wastewater Treatment Plant

This subject has caused a great deal of e-mails and many and varied opinions as to what should be done to handle the wastewater in Halton. I think it would be welcome news if those that are continually criticizing how it is presently being handled would present a plan that they KNOW will do what they say it should do.

I for one am not qualified to make such a suggestion and as far as I have seen in the e-mails I haven't seen any of the critics that are qualified to make such a recommendation.

I have always been of the opinion that I should not be critical of anything unless I have a solution for it and I understand that I am not alone in that opinion.

I look forward to seeing a sound recommendation and one that will do what the critics say should be done as to how it should be done from anyone of the many critics.

Fred Oliver
