Subject: Mid Halton Sewage

Treatment Plant

Dear Our Mayor & Our Councilors,

These is to response to the Region staff regarding the fact that
Mid
Halton facility was initially proposed in 1972, prior the exiting of
Glen
Abbey

From 1972 to 2003 the world has changed, the Soviet Union
disappeared, Berlin wall collapsed, China became a member in the
United Nation, GLEN ABBEY with its 20,000 residents exists in west
Oakville
and the smoking and odour is now considered health hazard.

It is the time for the Region Councilors and Staff to realize the
existence of Glen Abbey and its 20,000 residents

In your way to the Region on February 12, 2003 to attend the
Regional Council meeting, please use the side roads and drive to the
schools west of the third line and see yourself how close these
children to
the sewage treatment plant and to the odour

Based on the Region's forecast and budget this expansion will
start
on year 2006. 60 Days extension to the deadline will not have any
impact on the schedule.

Please vote to extend the deadline after February 07, 2003 to
have
more study and consultation with the residents.

Magdy Sidhom, P. Eng.
GARA Director
