Subject: Sewage Plant

Expansion

F.Y.I. The following letter was sent to Ann Mulvale on February 9, 2003 by email. Thank you.

I am writing to request that the Town stop the sewage plant expansion plans immediately and allow for more study, consultation and public input.

I listened to the Sewage Plant meeting on television last evening and was frightened by the lack of information known by the speaker representing the Plant expansion and the number of issues that are still outstanding.

At this time, with growth continuing in Halton at a ridiculous rate, homeowners can not be expected to sit back and let you and others ruin this Town. Stop this Sewage Plant, listen to your citizens' concerns, look to the future rather than continuing to do things as in the past. The past can not provide us the answers we need to move forward in a sustainable way.

Please look around and notice that the north of Oakville is ugly and boxlike and has totally ruined the small town aspects of Oakville. The transportation arteries are now a nightmare for all Oakville homeowners.

Public transit is non existent on holidays and weekends.Â Algae
isÂ forming
on the lake, likely due toÂ the sewage that exists today, and is
becoming a
burden to those living in Bronte. Enough.

If we do not stop immediately, this town will be ruined.Â We are fed
up
and will not take it anymore.

Yours,

Joan Fair
