Subject: Halton Waste

Management Expansion

02/13/2003  
12:58 AM

Councillor Elgar

In the past couple of months, is when I first heard of the Waste Facility Expansion Plan on the North Service Road. I'm currently a resident to Glen Abbey and moved here approximately three years ago from Mississauga. I investigated to the best of my ability what Oakville had to offer for my Family, and I was very pleased with the education system, recreation and the other amenities. I only found out a year ago where the Waste Water Plant was located, and recently was informed of it's expansion proposals.

I'm presently employed in commercial mechanical contracting business, and work in many areas around the GTA. On numerous mornings I get stuck in traffic on the QEW, near the East part of Etokicoke and wonder how these residents can put up with this putrid odour which overhangs their community. I hope and trust this does NOT happen to Oakville, further more the community of Glen Abbey.

I do not have a problem in paying for our Fair share of developments and improvements pertaining to Waste Water Treatment Program providing other Halton municipalities do the same, from the original Master Plan to the Current Plan.

I'm also concerned on the effects pertaining to the water front environment and how the Phosphorous will affect the Lake. I'd like to take a moment to Thank You and Councillor Flynn for the informative process that you've undertaken in making the Public aware of this situation. I just happened to catch the two latest broadcasts pertaining to this situation on Cogeco TV. I was very appalled by the Bureaucratic Process in the segment that was broadcasted February 12 and encourage your persistence to this cause. I totally support your thoughts in this matter and you may put me on your mailing list.

Thank-You Again,  
Sincerely

Keith Harding
